04 - EDUCATION

2009 – 2014

Bachelor in Computer Science
Western University

2006 – 2009

Software Engineering
Cambrian College

ABOUT - 02

After completing a 3-year degree in Software Engineering at Cambrian College, I decided to further my education to broaden my possibilities in the work field. I am now learning to become a Computer Scientist at the University of Western Ontario. I've worked for many notable companies such as "The Ministry of Natural Resources" MNR in Sudbury Ontario, Western University Engineering Department, Sudbury Hydro, and Vianet Internet Solutions. My experience combined with my education are a great asset
